

```
import java.util.Scanner;

public class Debug {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.println("How old are you? ");

        String age = sc.nextLine();

        System.out.println(22);

        int num1 = 15;

        int num2 = 25;

        System.out.println(num1 + num2); // What I learned: How to successfully add two integers
        and how to ask the user a statement.
```
